**Batch : 2024**  
**Zone no : Zone 8**

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

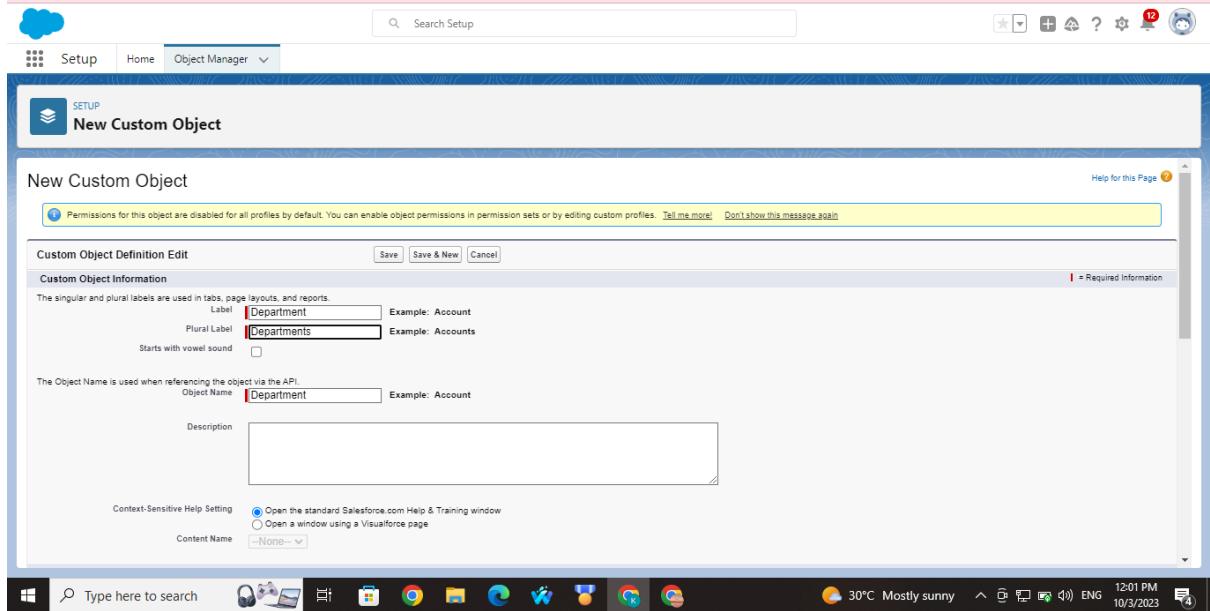

Solution:

### Step 1: Create Custom Objects

Assuming you have two custom objects, let's call them "College" and " Department". If you haven't already created these objects, you can do so by going to Setup > Object Manager > Create > Custom Object.

## Second custom objects, let's call them "Department"

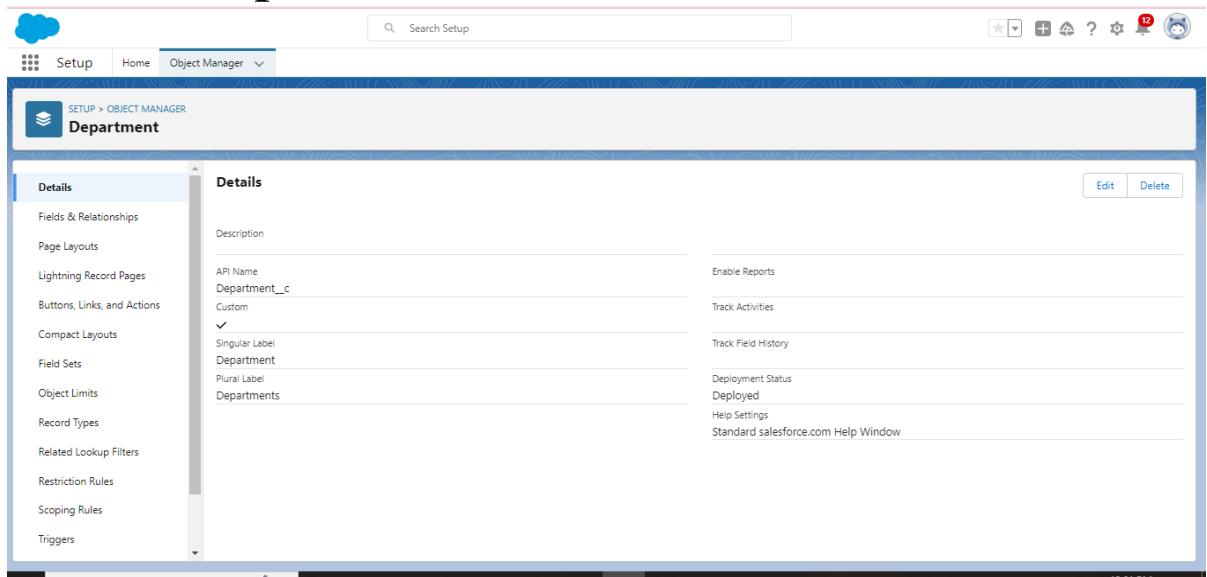

## Step 2: Create a Master-Detail Relationship

To create a Master-Detail relationship between these two custom objects, follow these steps:

1. Go to Setup > Object Manager.
2. Click on "College" to open its settings.
3. In the left sidebar, click on "Fields & Relationships."
4. Click the "New" button to create a new custom field.
5. Choose "Master-Detail Relationship" as the data type.

6. Enter a label for the relationship, e.g., "Department."
7. Choose " Department " as the related object.
8. Configure other settings as needed and click "Next."
9. Specify the field-level security and add it to relevant page layouts.
10. Click "Next" and "Save" to create the relationship.

The screenshot shows the Salesforce Setup interface for the 'college' object. The left sidebar is titled 'Fields & Relationships'. The main content area is titled 'Step 4. Establish field-level security for reference field'. It displays field-level security settings for the 'department' field, which is a Master-Detail relationship. The table shows visibility and read-only permissions for various profiles:

Field Level Security for Profile	Visible	Read-Only
Analytics Cloud Integration User	✓	□
Analytics Cloud Security User	✓	□
Authenticated Website	✓	□
Authenticated Website	✓	□
Contract Manager	✓	□
Cross Org Data Proxy User	✓	□
Custom: Marketing Profile	✓	□
Custom: Sales Profile	✓	□
Custom: Support Profile	✓	□
Customer Community Login User	✓	□
Customer Community Plus Login User	✓	□
Customer Community Plus User	✓	□

The screenshot shows the Salesforce Setup interface for the 'college' object. The left sidebar is titled 'Fields & Relationships'. The main content area is titled 'Step 6. Add custom related lists'. It displays settings for a new related list named 'colleges'.

Field Label: department  
Data Type: Master-Detail  
Field Name: department  
Description:

Related List Label: colleges

Add Related List: Page Layout Name: department Layout (checkbox checked)  
Append related list to users' existing personal customizations (checkbox checked)

## Step 3: Create the Roll-Up Summary Field

**Now, let's create a Roll-Up Summary Field on the "College" to calculate the total number of related records in "Department":**

- 1. Still on the "College" settings, go to "Fields & Relationships."**
- 2. Click the "New" button to create a new custom field.**
- 3. Choose "Roll-Up Summary" as the data type.**
- 4. Enter a label for the field, e.g.,**
- 5. Choose "Count" as the Roll-Up Type.**
- 6. Select "Department" as the object to roll up information from.**
- 7. Specify the filter criteria if you want to filter the related records.**
- 8. Configure other settings as needed and click "Next."**
- 9. Specify the field-level security and add it to relevant page layouts.**
- 10. Click "Next" and "Save" to create the Roll-Up Summary Field**

The top screenshot shows the 'New Custom Field' page for the 'department' object. It's Step 5 of 5, 'Add to page layouts'. The field details are: Field Label: college, Data Type: Roll-Up Summary, Field Name: college1. Under 'Page Layouts', 'department Layout' is selected. The bottom screenshot shows the 'Fields & Relationships' list for the 'department' object, displaying the newly created fields: college, college1, Created By, department Name, Last Modified By, and Owner.

department Name	Name	Text(80)		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		

## Step 4: Create a Lightning App

- 1. Type and select "App Manager."**
- 2. Click "New Lightning App."**
- 3. Fill in basic information (Name, Developer Name, Description).**

- 4. Choose the App Type (Standard, Console, Custom).**
- 5. Customize the Logo and Colour Scheme.**
- 6. Configure Navigation Items (objects to appear in the app's menu).**
- 7. Set the App Visibility (default access).**
- 8. Optionally, choose Record Pages (Lightning Record Pages).**
- 9. Review and Save the app.**
- 10. Assign the app to users or profiles.**
- 11. Test the app with the assigned users.**

The screenshot shows the Salesforce Setup interface. On the left, a sidebar lists various setup categories like Setup Home, Service Setup Assistant, and Administration. The main content area is titled "New Custom Object Tab" and is currently on "Step 2 of 3". It asks to choose user profiles for the new tab. A radio button is selected for "Apply one tab visibility to all profiles [Default On]". Below this, a table maps profiles to tab visibility settings. The profiles listed include Analytics Cloud Integration User, Analytics Cloud Security User, Authenticated Website, Authenticated Website, Contract Manager, Cross Org Data Proxy User, Custom: Marketing Profile, Custom: Sales Profile, Custom: Support Profile, and Customer Community Login User. Each profile has a dropdown menu set to "Default On". The status bar at the bottom shows it's 12:08 PM on 10/3/2023.

This screenshot shows the "New Custom Object Tab" setup page on "Step 1 of 3". It asks to choose a custom object for the tab. A dropdown menu shows "Object" selected with "Book" as the choice. Below it, a "Tab Style" dropdown is set to "Camera". An optional field for a "Splash Page Custom Link" is set to "None". A text input field for "Description" is empty. At the bottom right are "Next" and "Cancel" buttons. The status bar at the bottom shows it's 11:56 AM on 03-10-2023.

## Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality. Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply the Security for the users.

Solution:

Step 1: Create two separate custom profiles, one for Manager and one for sales manager.

The screenshot shows the Salesforce Setup interface with the 'Profiles' page open. The left sidebar has 'Users' expanded, with 'Profiles' selected. A search bar at the top left contains 'profi'. The main area is titled 'Profiles' and shows a list of profiles. The columns are 'Action', 'Profile Name', 'User License', and 'Custom'. The 'User License' column lists various license types like Analytics Cloud Integration User, Authenticated Website, Chatter External, Chatter Free, Chatter Moderator, Contract Manager, Cross Org Data Proxy, Custom Marketing Profile, Custom Sales Profile, Custom Support Profile, Customer Community Login, Customer Community Plus Login, and Customer Community Plus. The 'Custom' column indicates which profiles are custom, with several checked off. Navigation buttons at the bottom include 'Previous' and 'Next', and a page number '1 of 2'. The bottom status bar shows system information including language ('ENG IN'), battery level, signal strength, and the date ('03-10-2023').

The image displays two screenshots of the Salesforce Setup interface, illustrating the process of cloning and editing profiles.

**Screenshot 1: Clone Profile**

This screenshot shows the "Clone Profile" page. A search bar at the top left contains the text "profi". The main content area is titled "Clone Profile" and contains the following message: "Enter the name of the new profile." Below this, a note says "You must select an existing profile to clone from." A configuration section includes:

- Existing Profile: Salesforce API Only System Integrations
- User License: Salesforce Integration
- Profile Name: Manager

At the bottom are "Save" and "Cancel" buttons.

**Screenshot 2: Profile Edit**

This screenshot shows the "Profile Edit" page for the "Manager" profile. The left sidebar lists various setup categories, and the "Profiles" item under "Users" is selected. The main content area is titled "Manager" and contains the following information:

- Name: Manager
- User License: Salesforce Integration
- Description: (empty text area)

A "Custom Profile" checkbox is checked. Below this is a "Custom App Settings" table:

	Visible	Default

Receive Approval Request Emails	Only if I am an approver	High-Contrast Palette on Charts	
Federation ID		Load Lightning Pages While Scrolling	✓

The screenshot also shows the Windows taskbar at the bottom with various pinned icons and system status indicators.

Screenshot of the Microsoft Edge browser showing the Change Your Password page for the user jaya@kiot.ac.in.

The form fields include:

- Enter a new password for **jaya@kiot.ac.in**. Make sure to include at least:
  - 8 characters
  - 1 letter
  - 1 number
- \* New Password
- \* Confirm New Password
- Security Question: In what city were you born?
- \* Answer

The screenshot also shows the Windows taskbar at the bottom with various pinned icons and system status indicators.

The screenshot shows a Microsoft Edge browser window with the following details:

- Address Bar:** https://login.salesforce.com
- Salesforce Login Page:** The main content area displays the Salesforce logo and a login form. The form includes fields for "Username" (keerthi@kiot.ac.in), "Password" (redacted), and a "Log In" button. Below the password field is a "Remember me" checkbox. At the bottom of the form are links for "Forgot Your Password?" and "Use Custom Domain".
- Call-to-Action:** A blue button labeled "WATCH ON-DEMAND WEBINAR" is positioned above a decorative graphic.
- Decorative Graphic:** To the right of the button is a pink circular background featuring three small circular portraits of men and a brown cartoon bear wearing headphones, holding a blue heart, surrounded by butterflies and hearts.
- Taskbar:** The taskbar at the bottom of the screen shows several open windows:
  - Users | Salesforce
  - Welcome to Salesforce: Verify...
  - Lightning Experience | SalesforceOther visible icons include a search bar, file explorer, and various system status indicators like weather (30°C Mostly sunny) and date (10/3/2023).
- Windows Start Menu:** The bottom-most window is the Windows Start menu, titled "My College". It shows a search bar and a "No Items" message.

The screenshot displays two side-by-side views of the Salesforce interface.

**Left View (Salesforce Lightning Experience):**

- Header:** Sales, Home, Jaya A.
- Feed Post:** A post from "Jaya A" titled "A blank value to bank".
- Actions:** Like, Comment, Share.
- Text Input:** Write a comment...

**Right View (Setup Page - Profiles):**

- Header:** SETUP Profiles | Salesforce.
- Left Sidebar:** Q. prof, Users, Profiles (selected).
- Profile Edit:** salesmanager 1
- Fields:** Name (salesmanager 1), User License (Salesforce Platform), Description (empty), Custom Profile (checked).
- Custom App Settings:** Analytics Studio (standard\_Insights) (Visible: off, Default: on), App Launcher (standard\_AppLauncher) (Visible: off, Default: on), My College (My\_College) (Visible: on, Default: off). Platform (standard\_Platform) (Visible: on, Default: off), WDC (standard\_Work) (Visible: off, Default: on).
- Service Provider Access:** (disabled)
- Tab Settings:** (disabled)
- Buttons:** Save, Save & New, Cancel.

Both views show a Windows taskbar at the bottom with various application icons and system status.

Two screenshots of the Salesforce interface are shown side-by-side.

**Screenshot 1: User Profile Page**

The top screenshot shows the user profile for "JAYA DHARANI A". The profile includes a circular profile picture, the name "JAYA DHARANI A", the title "Worker", and the company "Kiot bank". Below the profile, there is a section titled "Details" with fields for Name, Title, Email, Manager, Company Name, and Phone. To the right, there is a "Related" section showing "Groups (0)" and "Files (0)". A banner at the top features a landscape with mountains, clouds, and a hot air balloon.

**Screenshot 2: Setup - All Users Page**

The bottom screenshot shows the "All Users" page in the Salesforce Setup. The sidebar on the left lists various setup categories like User Management Settings, Feature Settings, Data.com, Prospectors, Service, Embedded Service, and User Interface. The main content area displays a table of users with columns for Action, Full Name, Alias, Username, Role, Active, and Profile. One user is selected, showing details such as "Full Name: A\_JAYA.DHARANI", "Alias: JA", "Username: javadharanija@gmail.com", "Role: System Administrator", and "Active: Yes". Other users listed include "A\_JAYA.DHARANI", "Chatter Expert", "User\_Integration", and "User\_Security".

## Step 2:

### Permission Sets:

- Create two permission sets, one for manager and one for sales manager.

### Object-Level Security:

- In each profile and permission set, set the object-level security for the Account object to

"Read" to ensure that both I-manager and I- sales manager can view Account records.

### Record-Level Security:

- Implement record-level security using Criteria-Based Sharing Rules.

- Create a sharing rule that shares Account records owned by manager with manager and records owned by I sales manager with sales manager.
- For the sharing rule criteria, specify that records owned by manager are shared with user A, and records owned by sales manager are shared with sales manager.

#### Ownership:

- Ensure that the Account records are owned by the respective users, with manager owning their records and sales manager owning their records.

#### Organization-Wide Defaults:

- Set the organization-wide defaults for the Account object to "Private" to ensure that records are private by default.

#### Testing:

- Test the setup by logging in as manager and sales manager separately to verify that they cannot access each other's records.

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' tab selected. On the left, a sidebar lists various setup categories like Users, Feature Settings, and Sales. The main content area displays the 'Permission Set Overview' for 'salesmanager1'. It includes fields for Description (empty), API Name (salesmanager1), License (empty), Session Activation Required (unchecked), Namespace Prefix (empty), Last Modified By (KEERTHIKA\_G), and Created By (KEERTHIKA\_G). Below this is a section titled 'Apps' which contains three sub-sections: 'Assigned Apps', 'Assigned Connected Apps', and 'Object Settings'. A status bar at the bottom shows it's 3:28 PM on 10/3/2023.

This screenshot shows the 'Object Settings' page for the 'salesmanager1' permission set. The sidebar remains the same. The main content area shows a table of object permissions. The table has columns for Object Name, Object Permissions, Total Fields, and Tab Settings. Objects listed include Accounts, AI Insight Reasons, AI Record Insights, Alternative Payment Methods, API Anomaly Event Stores, App Analytics Query Requests, Application Usage Assignments, Appointment Categories, and Appointment Invitations. Most objects have 'No Access' permissions. A status bar at the bottom shows it's 3:39 PM on 10/3/2023.

Object Name	Object Permissions	Total Fields	Tab Settings
Accounts	No Access	40	--
AI Insight Reasons	No Access	--	--
AI Record Insights	No Access	--	--
Alternative Payment Methods	No Access	27	--
API Anomaly Event Stores	No Access	14	--
App Analytics Query Requests	No Access	--	--
Application Usage Assignments	No Access	--	--
Appointment Categories	No Access	3	--
Appointment Invitations	No Access	17	--

This screenshot shows the 'Object Settings' page for the 'books' object within the 'salesmanager1' permission set. The sidebar is identical. The main content area shows the 'Tab Settings' and 'Object Permissions' sections for the 'books' object. Under 'Tab Settings', there are 'Available' and 'Visible' tabs, both of which are currently empty. Under 'Object Permissions', there is a table with columns for Permission Name and Enabled. The permissions listed are Read, Create, Edit, and Delete, all of which are currently unchecked. A status bar at the bottom shows it's 3:40 PM on 10/3/2023.

Permission Name	Enabled
Read	<input type="checkbox"/>
Create	<input type="checkbox"/>
Edit	<input type="checkbox"/>
Delete	<input type="checkbox"/>

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' tab selected. The left sidebar includes sections for Profiles, Public Groups, Queues, Roles, User Management Settings, and Users (with sub-options for Data, Email, Platform Tools, Subscription Management, Apps, Feature Settings, Slack, MuleSoft, and Einstein). The main content area displays the 'Permission Sets' page with sections for Available and Visible profiles, Object Permissions (listing Read, Create, Edit, Delete, View All, and Modify All), and Field Permissions (listing book Name and Created By). The status bar at the bottom shows system information like weather (30°C Mostly sunny), time (3:40 PM), and date (10/3/2023).

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' tab selected. The left sidebar includes sections for Users, Permission Set Groups, and Permission Sets (which is currently selected). The main content area displays the 'Select Users to Assign' page, showing a list of users under the 'All Users' filter. The list includes Chatter Expert, Integration User, JAYA DHARANI A, JAYA DHARANI A, JAYASHRI A S, and Security User. A tooltip from K7TotalSecurity indicates that the license has expired. The status bar at the bottom shows system information like time (15:12) and date (17-10-2023).

The image contains two side-by-side screenshots of the Salesforce Setup interface.

**Screenshot 1 (Top):** This screenshot shows the 'Assignment Summary' page for the 'salesmanager' permission set. The table displays one assignment:

Full Name	User License	Expires On	Time Zone	Status
JAYASHRI A S	Salesforce Platform			Success

**Screenshot 2 (Bottom):** This screenshot shows the 'Current Assignments' page for the 'salesmanager' permission set. The table displays the same assignment:

Full Name	Active	Role	Profile	User License	Expires On
JAYASHRI A S	✓		salesmanager 1	Salesforce Platform	

3. Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

## Solution:

Step 1: we need create a profile for the two user which has the access to Create, Read, Edit for follow as per.

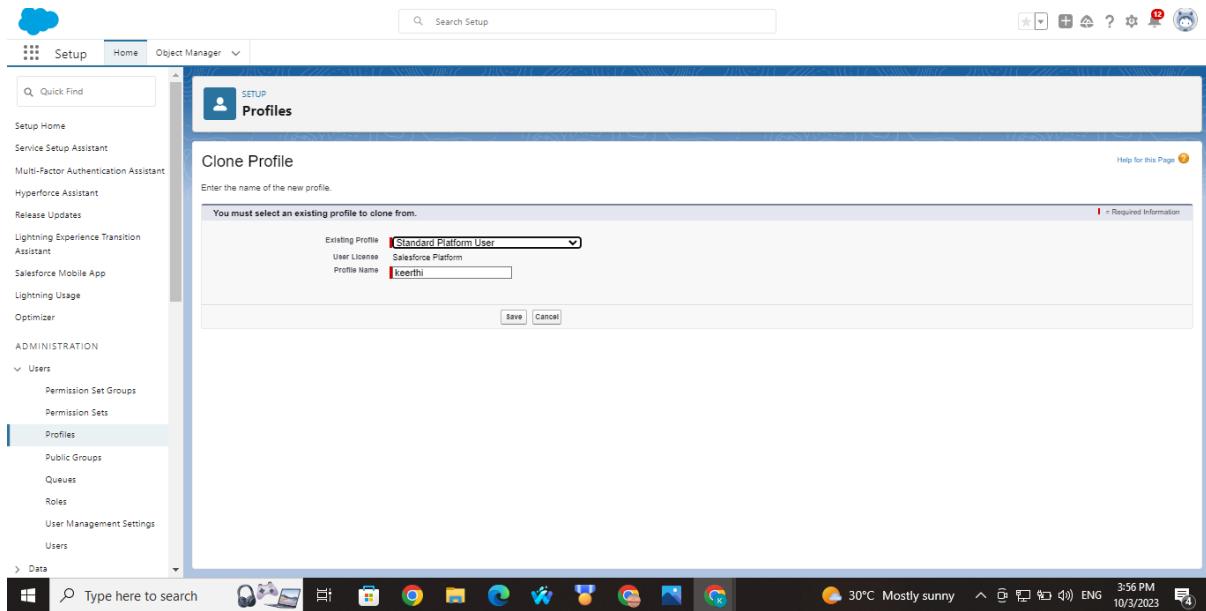

## Setup-quick search[profile]

The screenshot shows the Salesforce Setup interface with the following details:

- Left Navigation Bar:** Includes sections like Hyperforce Assistant, Users (Profiles selected), Data, Feature Settings, Sales, Products, Asset Settings, Product Schedules, Sales Processes, and Salesforce Scheduler.
- Header:** Shows "Search Setup" and various navigation icons.
- Page Title:** "SETUP Profiles".
- Profile Detail:** Profile Name: keerthi, User License: Salesforce Platform, Description: null, Created By: KEERTHIKAG, Created Date: 03/10/2023, 3:54 pm, Modified By: KEERTHIKAG, Modified Date: 03/10/2023, 3:54 pm. A "Custom Profile" checkbox is checked.
- Page Layouts:** Shows Standard Object Layouts for various objects like Global, Email Application, Home Page Layout, Account, Alternative Payment Method, etc., along with their respective layouts and assignment links.
- Bottom Status Bar:** Includes a search bar, system status (30°C, Mostly sunny), and system information (3:54 PM, 10/3/2023).

## Step 2:

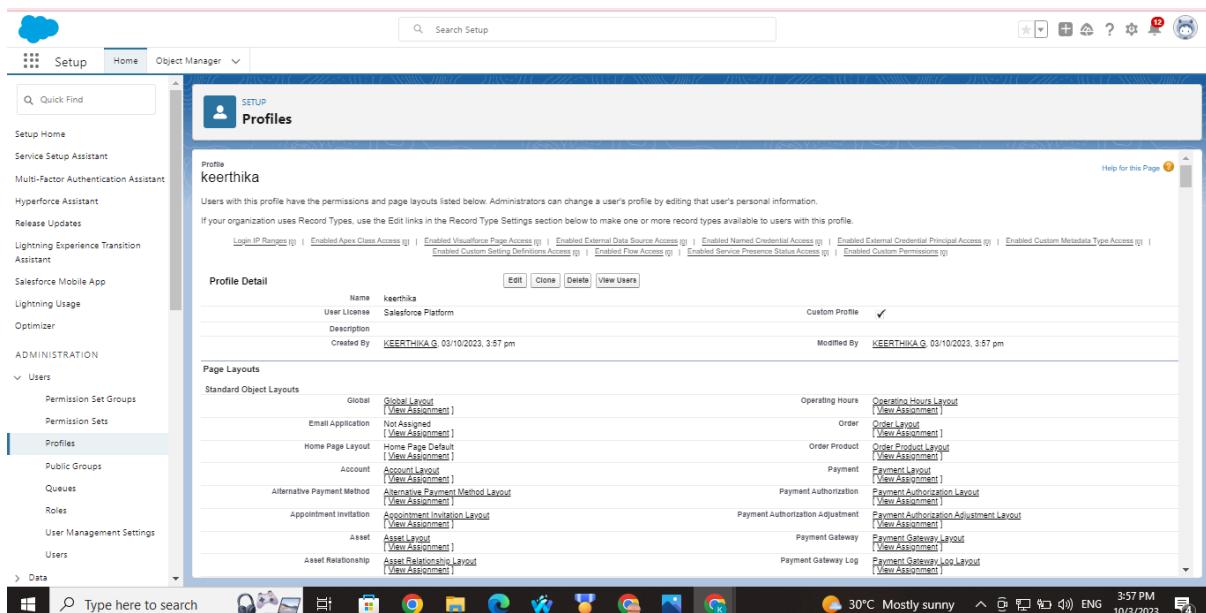

Click on the new to create a new profile along with the label and Api

Here I had made it my profile name as Jaga and the existing profile as Standard Platform User.

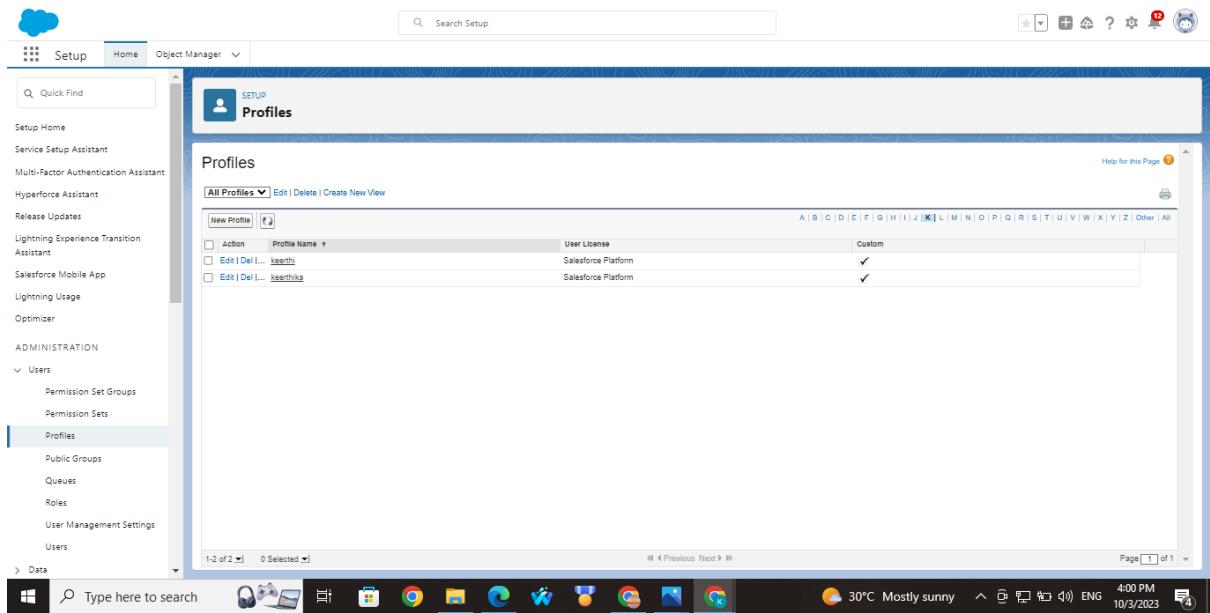

### Step 3:

Now click on the edit and scroll down to custom object settings and enable the read,create,edit and view options. After that click on save.

## Step 4

Now you can preview your created profile on the profile option here my profile name jaga has been created with the access of read,create,edit along with view on it

## Step 5:

Now create two users by enter into the Setup-quick search[user] and then click on new user after clicking that you need to create two user along with the profile as Jaga which we have created on the step 2.once the one user has been created click on the save&new so that you can create the second user and there the user name can be created with alternate name but with the same user profile and once the two user are created click on save.

The screenshot shows the Salesforce Setup interface under the 'Users' section. On the left, there's a sidebar with navigation links for Permission Set Groups, Profiles, Public Groups, Queues, Roles, User Management Settings (which is selected), and other setup categories. The main content area is titled 'All Users' and contains a table with columns for Action, Full Name, Alias, Username, Role, Active, and Profile. There are 10 users listed, each with a edit icon. The profiles shown include Partner App Subscription User, Chatter Free User, System Administrator, Analytics Cloud Integration User, and Analytics Cloud Security User. At the bottom of the table are buttons for New User, Reset Password(s), and Add Multiple Users.

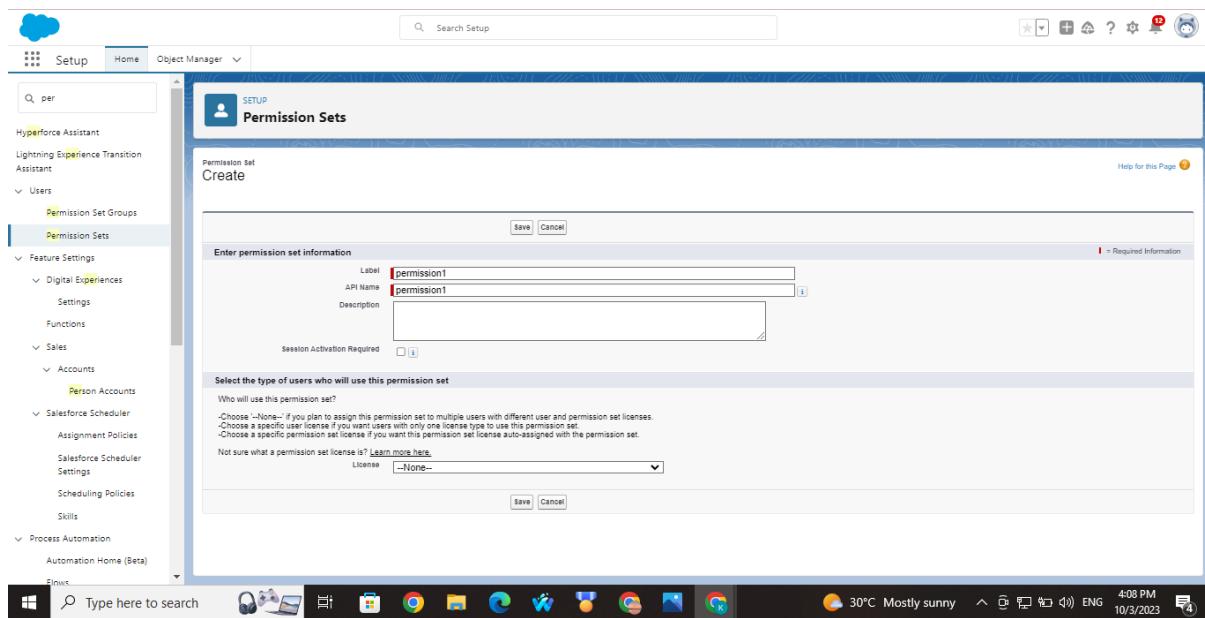

This screenshot shows the 'New User' creation page in the Salesforce Setup interface. The 'User Edit' tab is active, displaying a 'General Information' section with input fields for First Name, Last Name, Alias, Email, Username, Nickname, Title, Company, Department, and Division. To the right of the form, there's a large list of user roles and settings. The 'Role' dropdown is currently set to '<None Specified>'. Other tabs available include 'Profile', 'Marketing User', 'Office User', 'Knowledge User', 'Flow User', 'Service Cloud User', 'Site.com Contributor User', 'Site.com Publisher User', 'WDC User', 'Data.com User Type', 'Data.com Monthly Adoption Limit', 'Accessibility Mode (Classic Only)', 'High-Contrast Palette on Charts', 'Load Lightning Pages While Scrolling', 'Debug Mode', and 'Quick Access Menu'. The URL in the address bar is https://kiot-3f-dev-ed.lightning.force.com/one/one.app#/setup/Manage... .

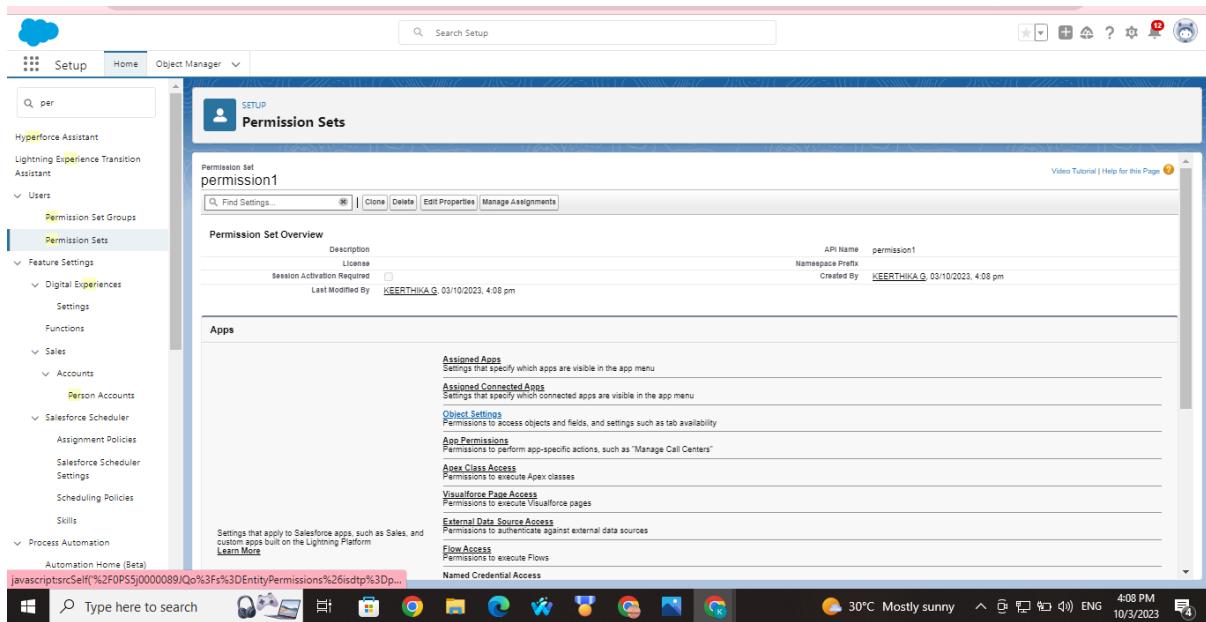

Now you can preview your two user that you have created in my side I had create the two users a Jagadesh11 and Jagadesh22 as a director channel sales with the marketing team.

## Step 6:

Now the two user as been created with the profile so that two user can perform the Create, Read, Edit and view on both the user. So as per the given task we need to allocate a specific access as delete on one user for that we need create a permission set for one user so it can created as

setup-quick search[permission set]-new-fill label name [auto select the API name]-click on save-object settings-accounts.

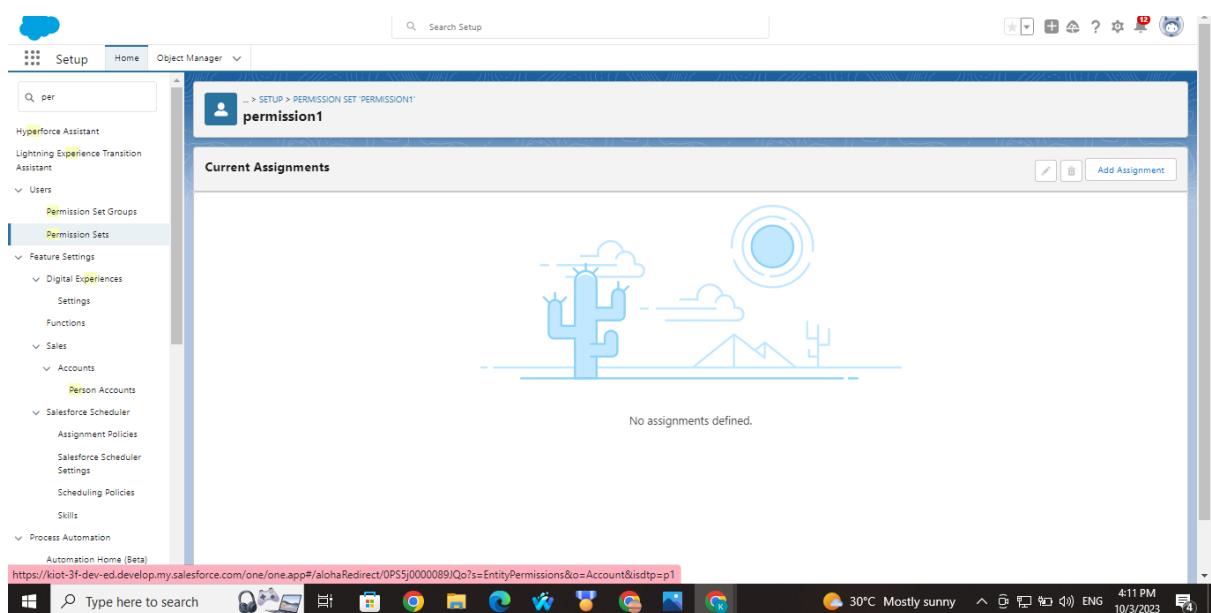

## Step 7:

Now to give the specific delete access to the user click on edit on the Account and then enable the read,create,edit and the delete on it so that the permission set will have a specific special access on it. once it has been done click on save and then click on manage assignment.

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' page open. The URL in the browser bar is <https://kiot-3f-dev-ed.my.salesforce.com/one/one.app#/alohaRedirect/0PS500000089/Qo?set=EntityPermissions&o=Account&isdtp=p1>. The page displays the 'permission1' permission set for the 'Accounts' object. Under 'Object Permissions', 'Read' is checked. Under 'Field Permissions', 'Account Name' has 'Read Access' checked and 'Edit Access' unchecked.

## Step 8

Now click on add assignment there you will find your two created users click on any one user to give a special access as delete on it and then click on assign so that the specific selected user can have a special access as delete on it.

# Click on next

The screenshot shows the Salesforce Setup interface for assigning a permission set. The left sidebar is collapsed, and the main area displays a list of users under the heading "Select Users to Assign". The "All Users" filter is selected, showing six items. Each user entry includes a checkbox, their full name, alias, username, role, active status, and profile. A search bar at the top right of the list allows filtering the results. A "Cancel" button is located at the bottom left of the list area. A small modal window titled "K7TotalSecurity" is overlaid on the page, displaying a warning message: "K7TotalSecurity License has expired. Click here to resolve..". The system status bar at the bottom right shows "15:12 17-10-2023".

# Now click on Assign.

Now the specific access for the Jagadesh11 user has been assigned successfully.

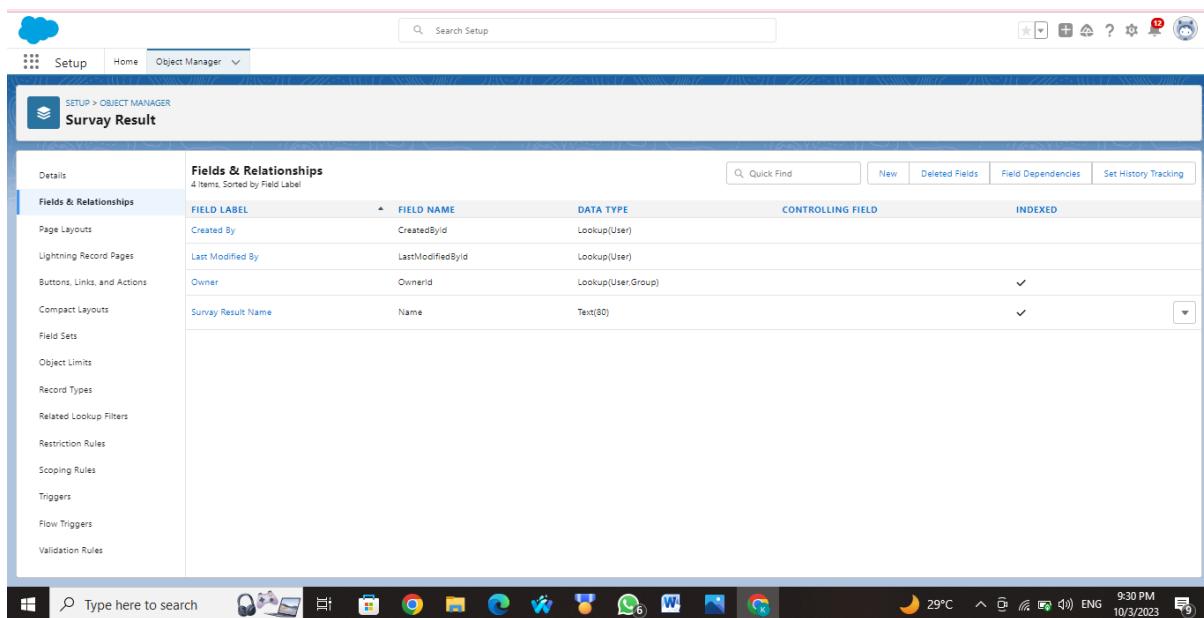

4.Create a screen flow for a basic survey to fill in the details for any form.

Solution:

Step 1: Create a Custom Object

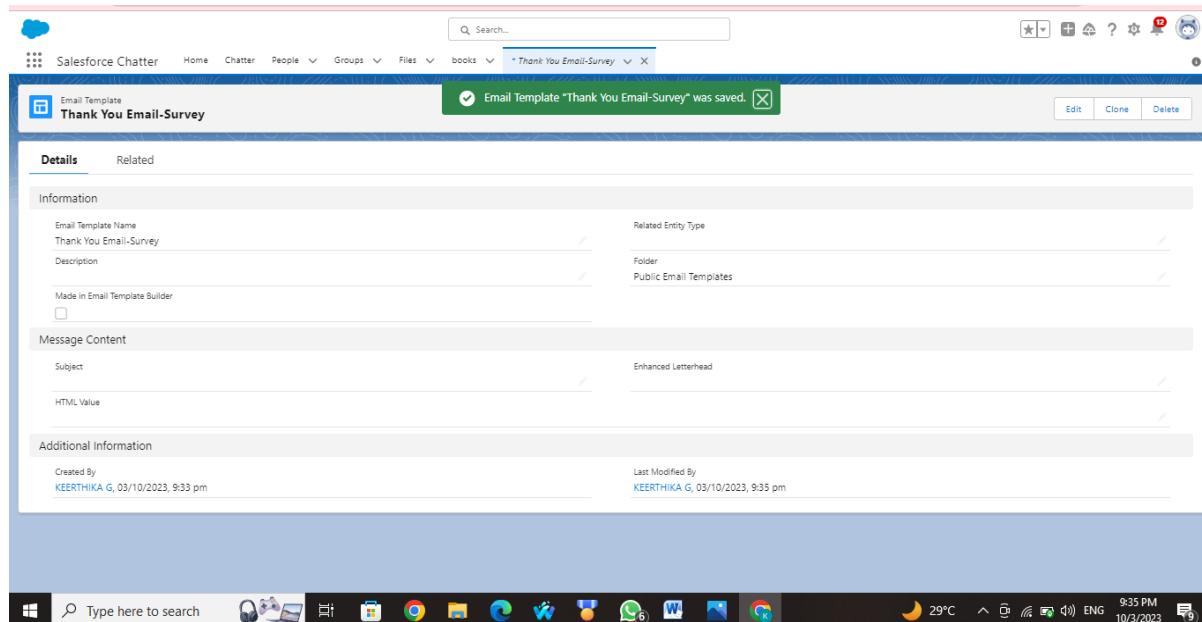

The next step is to create a custom object **Survey Result** and a few custom fields to store survey responses.

1. Click **Setup**.
2. In the Object Manager, click **Create | Custom Object**.
3. Now create a custom object **Survey Result** and fields as shown in the screenshot below:
4. Click **Save**.

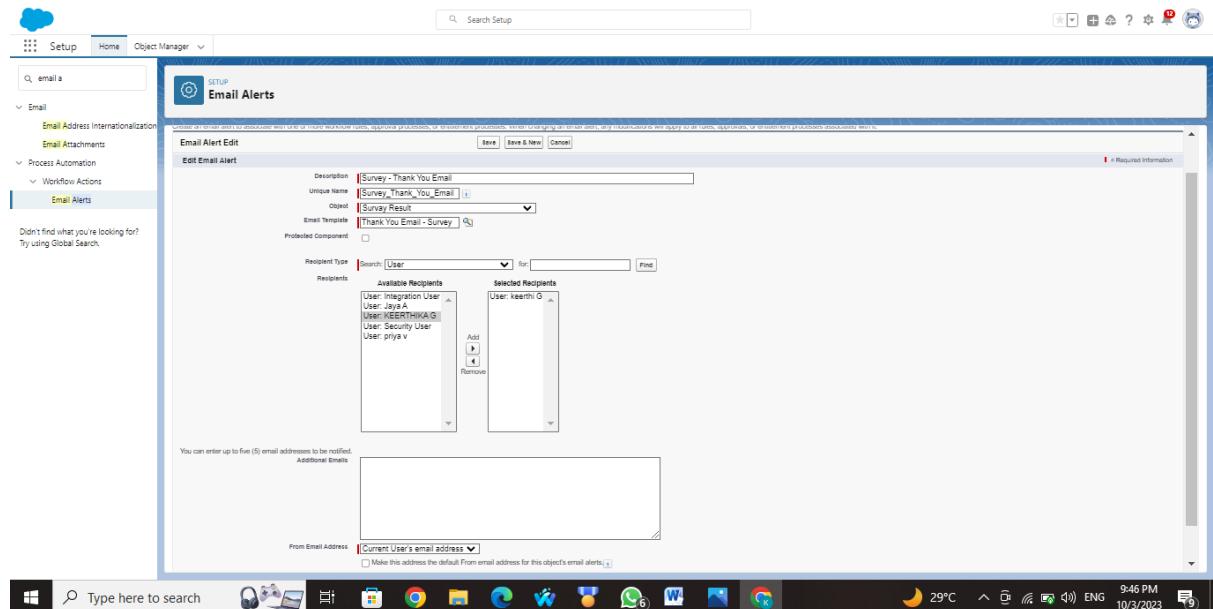

## Step 2: Create a Thank You For Survey Lightning Email Template

1. Click **App Launcher**.
2. In the Quick Find box, type **Email Templates**.
3. Clicks on the **New Email template** button.
4. Name the **Lightning Email Template** and make sure to store it in the **Public Email Templates** folder.
5. Create a template like the following screenshot.

## Step 3: Create an Email Alert

1. Click **Setup**.
2. In the Quick Find box, type **Email Alerts**.
3. Select **Email Alerts**, click on the **New Email Alert** button.
4. Name the **Email Alert** and click the Tab button. The **Unique Name** will populate.
5. For **Object** select **Survey Result**.
6. For the **Email Template** chooses **Lightning Email Template Thank You Email – Survey**.
7. For **Recipient Type** select **Email Field: Email**.
8. Click **Save**.

## Step 4.1: Salesforce Flow — Create a Screen that Allow Users to Fill Survey

1. Click **Setup**.
2. In the Quick Find box, type **Flows**.
3. Select **Flows** then click on the **New Flow**.
4. Select the **Screen Flow** option and click on **Next** and configure the flow as follows:
  1. **How do you want to start building:** Freeform
5. We will use the **Screen** element to capture a **Survey response** form. Drag and drop a **Screen** element onto the canvas.

## Step 4.2: Salesforce Flow — Add a Record Creates Element to Save Survey Response

1. Drag-and-drop the **Create Records** element onto the Flow designer.
2. Enter a name in the **Label (Save Response)** field; the **API Name** will auto-populate.
3. For **How Many Records to Create** – select **One**.
4. For **How to Set the Record Fields** – select **Use separate resources, and literal values**.

5. Select the **Survey Result** object from the dropdown list.

**6. Set Field Values for the Survey Result**

1. Row 1:

1. **Field: Comment\_c**

2. **Value: {!Comment}**

2. Click **Add Row**

3. Row 2:

1. **Field: Email\_c**

2. **Value: {!Email.value}**

4. Click **Add Row**

5. Row 3:

1. **Field: Name\_c**

2. **Value: {!Name.firstName}**

**{!Name.lastName}**

6. Click **Add Row**

7. Row 3:

1. **Field: Rating\_c**

2. **Value: {!Rating}**

7. Click **Done**.

Edit Create Records

Create Salesforce records using values from the flow.

\* Label: Save Response      \* API Name: Save\_Response

Description:

Name__c	<input type="text" value="(!Name.firstName) {!Name.lastName}"/>
Rating__c	<input type="text" value="A_a Rating"/>
<a href="#">+ Add Field</a>	
<input type="checkbox"/> Manually assign variables	

Cancel      Done

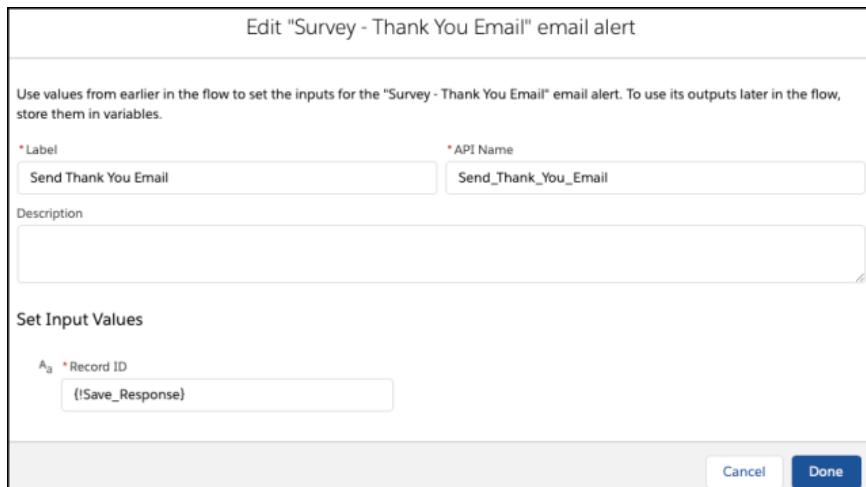

## Step 4.3: Salesforce Flow — Call an Acton — Email Alert to Send Out Thank You Email

The next step is to call the **Survey – Thank You Email** email alert from flow so that when flow fires it triggers the thank you email to survey participants.

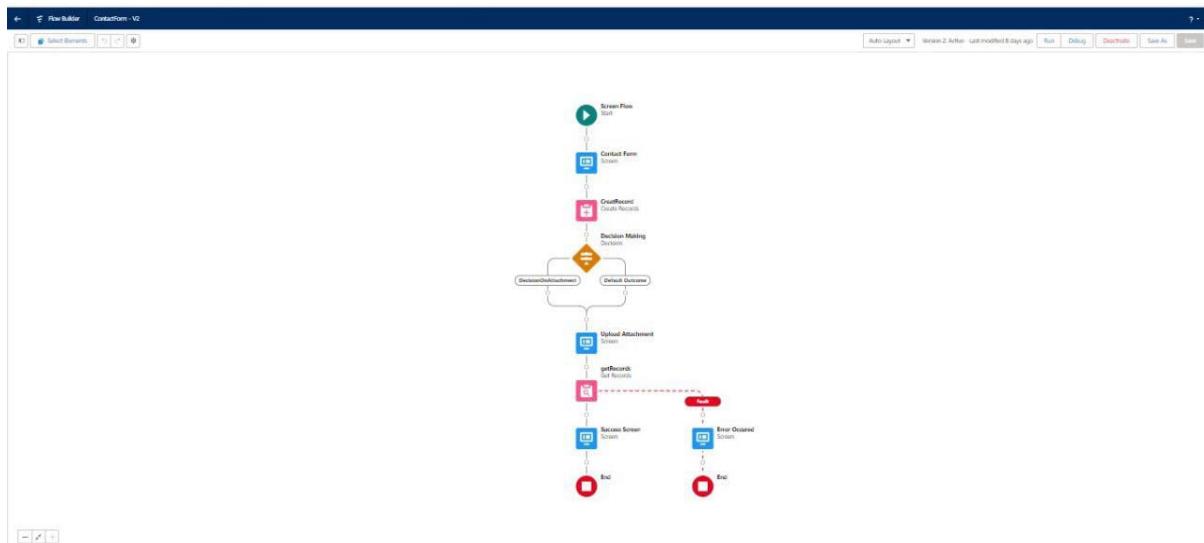

1. Under **Toolbox**, select **Element**.
2. Drag-and-drop **Action** element onto the Flow designer.
3. In the **Action** box, type **Survey – Thank You Email**.

## 4. Clicks on the Survey – Thank You Email email alert.

### 5. Click Done.

In the end, Sergio's Flow will look like the following screenshot:

### 1. Click Save.

2. Enter Flow Label the API Name will auto-populate.

3. Click Show Advanced.

## 4. How to Run the Flow: User or System Context—Depends on How Flow is Launched

5. Type: Screen Flow

6. API Version for Running the Flow: 51

7. Interview Label: Survey

Last Modified  
12/21/2020, 4:54 PM by Rakesh Gupta

Status: Active

Type: Screen Flow

Version Number: 2

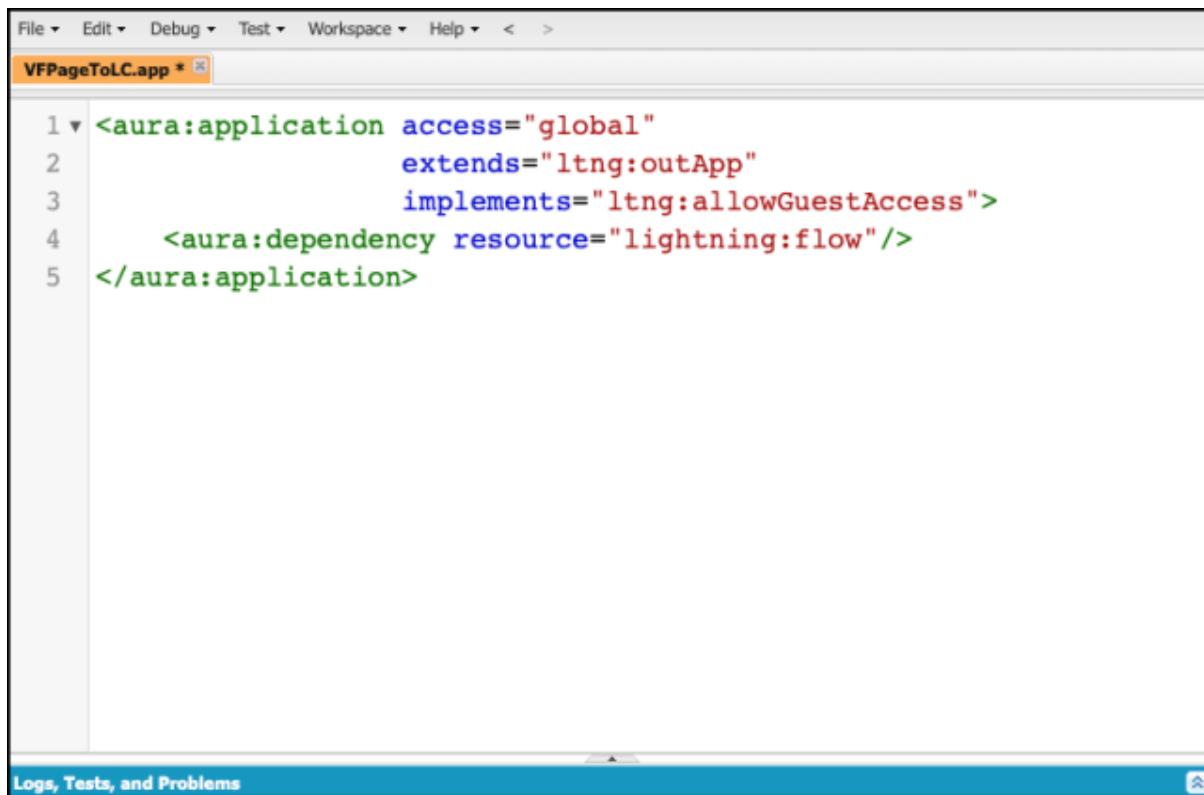

Cancel Save

The screenshot shows the 'Save as' dialog for a new flow. The 'A New Version' button is highlighted. The flow is named 'Survey' with an API name of 'Survey'. The 'How to Run the Flow' setting is 'User or System Context—Depends on How Flow is Launched'. The flow type is 'Screen Flow' and the API version is '51'. The interview label is set to the formula '{!\$Flow.CurrentDateTime}'. The status is 'Active', the type is 'Screen Flow', and the version number is '2'. The dialog includes 'Cancel' and 'Save' buttons.

## Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a Visualforce Page

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

1. Click **Setup | Developer Console**
2. Navigate to **File | New | Lightning Application**
3. Enter a **Name (VFPagetoLC)** field, make sure to select the **Lightning Out Dependency App** checkbox.
4. Click **Submit**.
5. Copy code from [\*\*GitHub\*\*](#) and paste it into your Lightning Application.
6. **Save** your code.

The screenshot shows the Salesforce IDE interface. The top menu bar includes File, Edit, Debug, Test, Workspace, Help, and navigation icons. A tab labeled "VFPageToLC.app \*" is active. The main editor area contains the following code:

```
1 <aura:application access="global"
2     extends="ltng:outApp"
3     implements="ltng:allowGuestAccess">
4     <aura:dependency resource="lightning:flow"/>
5 </aura:application>
```

The code defines a Lightning Application named "VFPageToLC.app" with attributes for access, extension, implementation, and a dependency on the "lightning:flow" component.

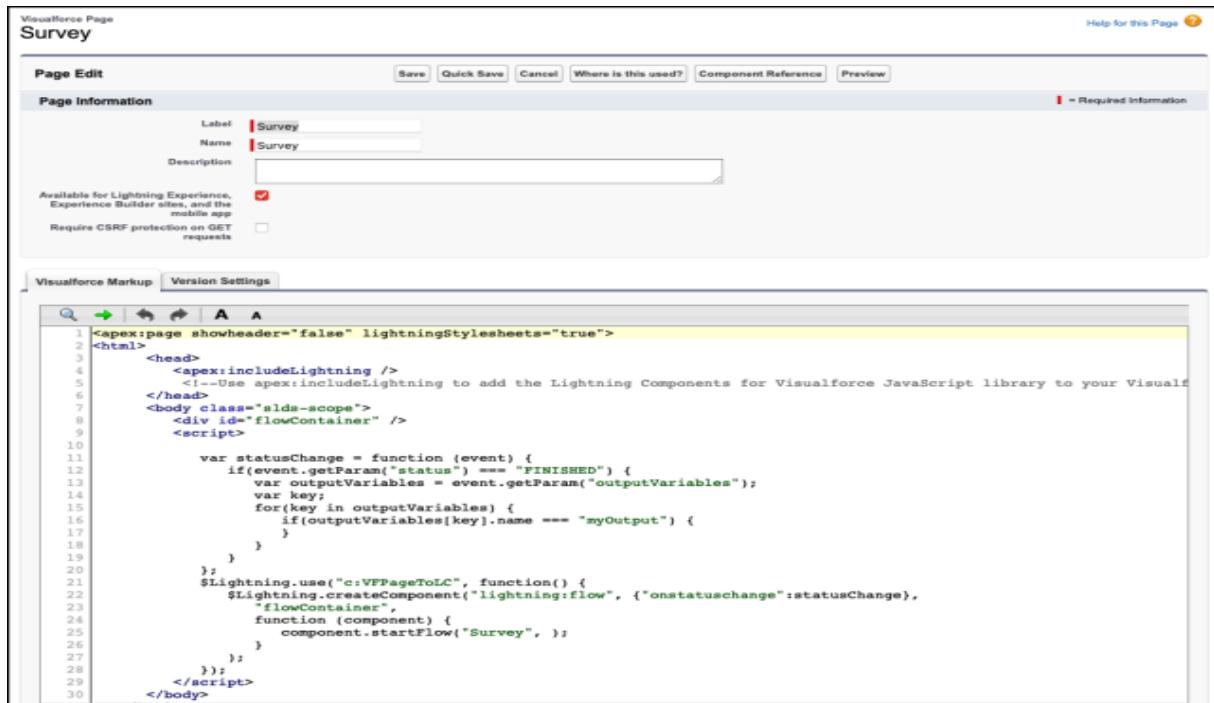

## Step 6: Create a Visualforce Page and Embed Your Flow Into It

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

Add the Lightning Components for Visualforce JavaScript library to your Visualforce page using the **<apex:includeLightning/>** component. In the Visualforce page, reference the dependency app. Then write a JavaScript function that creates the

# component on the page using `$Lightning.createComponent()`

1. Click **Setup**.
2. In the Quick Find box, type **Visualforce Pages**.
3. Clicks on the **New** button.
4. Copy code from [GitHub](#) and paste it into your visualforce page
5. Click **Save**.

## Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

1. Click **Setup**.

2. In the Quick Find box, type **Sites**.
3. Clicks on the **New** button.
4. Fill the details as per the screenshot below:
5. Click **Save**.

**Site Edit**

**Save** **Cancel**

Site Label	Survey

8:09 PM (1 minute ago)   

Hi Alok Sinfal,

Thanks for taking time out to participate in our survey. We are very appreciative of the time you have taken to assist in our analysis, and commit to utilizing the information gained to contemplate and implement worthwhile improvements. We will share these results with you through your State Survey Agency, whom we also thank for their generous participation.

Once again, we are extremely grateful for your contributing your valuable time, your honest information, and your thoughtful suggestions.

Thanks,  
Automation Champion
